

EFT Technique of Matrix reImprinting and Meta-Medicine® is the Perfect Marriage

“ META-Medicine® and EFT is a marriage made in heaven between two health disciplines. META-Medicine® is not a therapy but an amazing diagnostic system that allows you to determine the specific event that causes an illness and then EFT can clear that specific event – thereby restoring health.” Richard Flook, Head of International training, META-Medicine® www.metamedicine.org

META-Medicine® was developed by medical doctors and health practitioners worldwide and through the use of modern CT imaging it has mapped the trapped emotional conflicts that get stuck in the brain and specific organs to their original stressful cause. It also answers how and why certain symptoms are there, what caused them; why do specific organs and the brain uniquely react to certain stressful events.

By using META-Medicine® with Matrix reImprinting, you can get to these trapped emotional conflicts quicker and with more accuracy than intuitively searching for the emotion. (click here to read more about Matrix reImprinting)

Trainers Richard Flook (Head of the International Training, META-Medicine®) and Karl Dawson (EFT Master and Creator of Matrix reImprinting) have created a 9 DVD set which teaches Meta-Medicine details and Matrix reImprinting. Along with the teaching of Meta-Medicine, there are more than 5 demonstrations showing Meta-Medicine diagnosis and using EFT Matrix reImprinting as therapy to treat and alleviate disease.

Learn the secret road map in tapping for diseases using META-Medicine® Diagnoses

“META-Medicine® tells you specifically which “trees” to clear (terminology from Gary Craig’s EFT Manual), streamlining EFT’s already amazingly quick results.” Karin Davidson, AAMET Trainer and Level 3 Practitioner www.howtotap.com

META-Medicine® works by asking targeted questions in conjunction with brain mapping, the aim is to quickly determine the root cause of a client’s illness, diagnose exactly where they are in their disease cycle and as a result, design a ‘road map’ so you, as the EFT practitioner, quickly and easily know the particular emotional cause of the disease to clear.

“When I first started to hear about Meta Medicine I couldn’t get my head around it and truthfully couldn’t see a reason for needing it. I thought, “Well, we get to that eventually anyway.” And when I first tried using it, I felt like I was learning to drive all over again after already driving for over 40 years. I actually wasted a lot of time veering off my ‘meta road map’ during my first session.

However, it did not take long before I not only got my head around it but quickly began to see the amazing results and the fantastic value. Once it had ‘clicked’ for me, and I began to work with my client, Kari, on depression, it was so exciting to see something that is often very difficult to get to the root of and often would take several sessions, just simply vanish in less than two hours! The transformation in her was so amazing that all evening long I kept looking at her and thinking: She simply cannot be that same girl that has been here the past two days! She even LOOKS different and is definitely acting different. She had more

shine to her hair, more light in her eyes. And even though we often see such transformations with EFT, this somehow seemed to be even quicker.

I've been working with EFT for over five years and see tremendous results but I'm absolutely sold on Meta Medicine. It's so much easier to go after something when you have a clear road map to follow. (even if women aren't supposed to be able to read maps!) And although EFT is often very quick, it can be even quicker with that road map."
